

i-index: Calling all Inventors! Measure and Showcase your Innovation Footprint

The screenshot shows the 'i-index and Summary' report for John Doe. The report is powered by Relecura and features a central graphic with the i-index score of 3.04, the name John Doe, and the date March 28, 2019. To the right of the graphic, there are four sections of data:

- Top Technologies:** Medicinal preparations containing organic active ingredients; Drugs for nervous system disorders; Medicinal preparations containing active ingredients; Accessories or details for hand carts; Carriages for children
- Top Patent Owners:** SYNGENTA; BRITAX EXCELSIOR; HOPE WORKS LIMITED; J&P LAB CO LTD; LAKEWOOD LIMITED
- Top Companies Cited:** 10+ companies cited
SYNOSIA THERAPEUTICS; CTS FAHRZEUG DACHSYSTEME GMBH; DART NEUROSCIENCE (CAYMAN) LTD; DART NEUROSCIENCE CAYMAN LTD; DIPHARMA S A
- Number of Patents:** Total 21 - 10 Grants and 11 Applications

At the bottom of the report, there is a section titled 'Brief view of selected Patents'.

Relecura has created a free tool that measures the productivity and impact of inventors (<https://inventor.relecura.com/>). Users can search and showcase the impact of their inventions with their i-index report. Read more about it by going to the following link.

<https://blog.relecura.com/2019/03/i-index-measure-and-showcase-your-innovation-footprint/>

The calculation of the i-index is similar to that of the h-index used by scholars to measure their research output. More information about the factors it includes can be found on our blog.

<https://blog.relecura.com/2019/03/a-peek-into-the-inventor-index/>

The i-index report can be easily shared with others via e-mail, social media including LinkedIn and on professional online profiles, company websites and the like. The i-index can be used to identify prolific inventors whose inventions have had a far-reaching impact. More below.
