

# Invitation to Questel Orbit.com's free workshop during PIUG 2010

Questel is pleased to invite you for a full-day workshop on [orbit.com](http://orbit.com) and [MMS](#) on Wednesday, October 13, from 9AM to 4PM. We are pleased to offer breakfast, lunch, refreshments and snacks. Please kindly mention your presence with us for lunch by October 10th to Sophie Ames at [sames@questel.com](mailto:sames@questel.com).

## 9:00AM: Breakfast

### 9:30AM: [ORBIT.COM 1.3 – Questel's enhanced IP Portal! Semantics at the service of concept analysis and clustering](#)

**Speaker: Miguel Iglesias, Northern America Sales Manager**

A new version of Orbit.com will be released this fall and presented at this workshop. We are proud to now offer **concept analysis** in Orbit.Com. This allows users to take semantics to a whole new level. Concepts in patents can be ranked, landscaped, and white space can be identified. Sorting search results by "relevance" will now take into account the types of fields, frequency, and proximity of keywords and be much more powerful.

## 12:00PM: Lunch

### 1:00PM: [Merged Markush Service Basic Training Workshop](#)

**Speaker: Joe Terlizzi, IP Specialist**

This seminar covers the Merged Markush Service (MMS), a chemical structure searching database for Markush structures in patents, exclusively available on Questel. It is intended for beginners or as a refresher for the experienced searcher.
